

What I am looking for is an ABS power pump for variable controller. That's what my mechanic says I need. So far my search has been nationwide including being on the watch list on the junk yard network.... My car is in 1999 C5... Any assistance that you or anyone you know can provide to me would be greatly appreciated! My brakes are working, but I have no ABS system....541 430-6078....
